

CMMC: Cybersecurity Assessments

Cask Government Services (Cask) is the 3rd CMMC Third Party Assessor Organization (C3PAO) authorized by the Cyber-AB.

In today's rapidly evolving cyber landscape, ensuring your organization's compliance with the Cybersecurity Maturity Model Certification (CMMC) is not just a regulatory necessity, but a strategic advantage. Our Assessment service aligns with the current CMMC Assessment Process (CAP) and NIST Methodology offering a comprehensive evaluation of your cybersecurity posture.

By choosing Cask Government Services, you are not only taking a proactive step towards meeting future federal contract requirements but also ensuring your cyber defenses are implemented against escalating threats. Your NIST 800-171/CMMC Level 2 Assessment is a crucial instrument for any organization aiming to navigate the complexities of cyber compliance confidently and effectively.

Ensure your CMMC readiness with our expert Assessors. Contact Cask today to begin our compliance conversation. cmmc@caskgov.com

CMMC and JSV/NIST 800- 171 Assessments

Why Cask?

Choosing Cask for your Cybersecurity Maturity Model Certification (CMMC) needs means partnering with a team whose experience in the field of cybersecurity is both deep and broad. At Cask, we pride ourselves on a rich history of delivering tailored cyber solutions, underpinned by a profound understanding of the evolving cyber landscape and CMMC requirements. Cask has conducted successful Joint Surveillance Voluntary (JSV) Assessments from small businesses to top 5 defense contractors. Cask's robust Assessment Team is equipped to meet the needs of our clients at every level.

Our Assessors

Our assessors are not just experts in cybersecurity; they are seasoned CMMC Certified Assessors who have provided Cyber Assessments to the Department of Defense (DoD) and Commercial Markets for over 19 years. Our assessors bring a wealth of practical experience, ensuring that assessments are thorough, insightful, and aligned with the latest industry standards. This unique combination of experience and practical knowledge positions Cask as a leader in the CMMC ecosystem. Cask provides your organization with unparalleled guidance and support in navigating the complex requirements of cybersecurity.

Where to Start?

1. **Understand the CMMC Level Requirements:** Determine which of the three CMMC levels is applicable to your company based on the type of information handled and required by Department of Defense (DoD) contracts.
2. **Conduct a Self-Assessment:** Before undergoing a formal assessment, perform an internal review against the CMMC practices and processes for your targeted level.
3. **Implement required Cybersecurity Controls:** Based on the self-assessment, implement or enhance cybersecurity practices and processes to meet the specific requirements of the CMMC level you are targeting.
4. **Documentation and Evidence Preparation:** Prepare thorough documentation of Cybersecurity Policies, Procedures, and Practices as evidence of compliance. This includes a System Security Plan (SSP) and other relevant documents that demonstrate adherence to CMMC requirements.

Speaking your Language

At Cask we are experts in cyber compliance and security; we're your bridge to understanding this complex field in clear, straightforward terms. We believe that the intricacies of cybersecurity and CMMC requirements shouldn't be a barrier to your understanding and involvement. That is why our approach is grounded in plain-spoken communication, ensuring that the technical aspects of cyber compliance are made accessible and understandable to everyone, regardless of their technical background.

With Cask, you gain a team of cybersecurity specialists with clear, jargon-free guidance that demystifies the Assessment Process.

Successful with Large and Small Business

Cask understands the unique challenges and needs that come with operating in this space. We recognize that efficiency, cost-effectiveness, and tailored solutions are not just preferences but necessities for large and small businesses. Our Assessment Team is key in this regard. By maintaining a robust team of certified professionals, we ensure that our services are of highest quality, efficient and streamlined. This equates to reduced overhead and overall cost savings for Cask and our Clients.

The Highest Standards and Quality

We are committed to providing CMMC assessment services that are compliant with the highest standards, realistically attainable, and financially viable for small businesses as well as large organizations. Our approach is to work alongside you, respecting your resource constraints while never compromising on the quality of the assessment. At Cask we don't just offer services; we offer a partnership that understands and values the small business ethos, ensuring that you are supported and equipped to meet CMMC requirements without undue financial strain.

A Partner Along your Compliance Journey

At Cask, we understand that navigating the compliance journey towards CMMC Certification is a collaborative and a dynamic process. As your partner in this journey, our approach is centered around close coordination and transparent communication every step of the way. From the onset, we establish a clear timeline, setting realistic milestones and checkpoints that align with your schedule and operational demands. Regular updates and interactive sessions are integral to our service, providing you with timely insights and the opportunity to ask questions and have your concerns addressed, promptly.

Once you are ready to conduct your assessment, contact Cask, cmmc@caskgov.com and we'll work with you to schedule the assessment.
